

# Assignment 3 - Section 1 project

Nanfang Hong (U92430309), Jiajian Guo (U43469879)

February 17, 2018

## Background

### US-Mexico border apprehensions hit 17-year lows

(Washington, CNN) Apprehensions at the US-Mexico border reached historic lows in April, continuing a downward slide in the first few months of the Trump administration. Out of curiosity, let's see what data can really tell us.

## Tables

We collected the data of US-Mexico border apprehensions at 2010 and 2017.

|     | Big Bend | Del Rio | El Centro | El Paso | Laredo | RG Valley | San Diego | Tucson | Yuma |
|-----|----------|---------|-----------|---------|--------|-----------|-----------|--------|------|
| Oct | 530      | 1119    | 2589      | 1007    | 2613   | 4236      | 5017      | 23197  | 582  |
| Nov | 421      | 897     | 2412      | 894     | 2130   | 3688      | 4738      | 16986  | 649  |
| Dec | 373      | 697     | 2196      | 725     | 1802   | 2987      | 4636      | 10907  | 711  |
| Jan | 433      | 1234    | 2688      | 1124    | 2526   | 3658      | 6413      | 16122  | 586  |
| Feb | 484      | 1245    | 2836      | 1140    | 3173   | 4845      | 6982      | 21266  | 819  |
| Mar | 660      | 1874    | 4408      | 1528    | 4433   | 7141      | 9061      | 31197  | 1059 |
| Apr | 575      | 1791    | 3419      | 1359    | 4528   | 7139      | 7115      | 28579  | 732  |
| May | 493      | 1718    | 3126      | 1380    | 3813   | 7477      | 5858      | 22572  | 608  |
| Jun | 415      | 1326    | 2440      | 1005    | 3475   | 5595      | 5092      | 13160  | 447  |
| Jul | 280      | 767     | 2331      | 725     | 1857   | 3832      | 5113      | 10303  | 401  |
| Aug | 295      | 1095    | 2075      | 732     | 2819   | 5329      | 4528      | 9280   | 262  |
| Sep | 329      | 931     | 2042      | 632     | 2118   | 3839      | 4012      | 8633   | 260  |

Table 1: Data Table of Border Apprehensions 2010

|     | Big Bend | Del Rio | El Centro | El Paso | Laredo | RG Valley | San Diego | Tucson | Yuma |

| Sep | 614      | 932     | 1988      | 1540    | 2097   | 8836      | 2242      | 3016   | 1272 |

Table 2: Data Table of Border Apprehensions 2017

# Data Visualization

Comparing 2010 and 2017 statistics by month and sector:

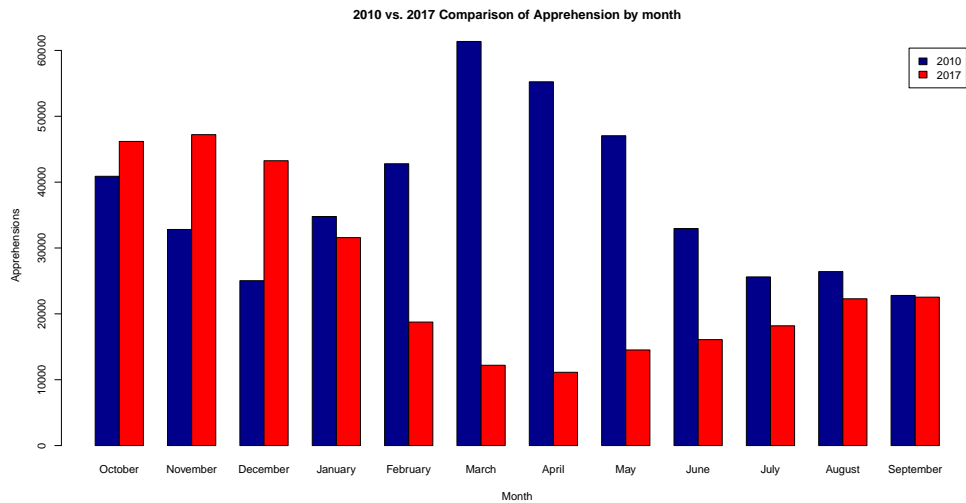

Figure 1: 2010 vs. 2017 Comparison of Apprehension by month

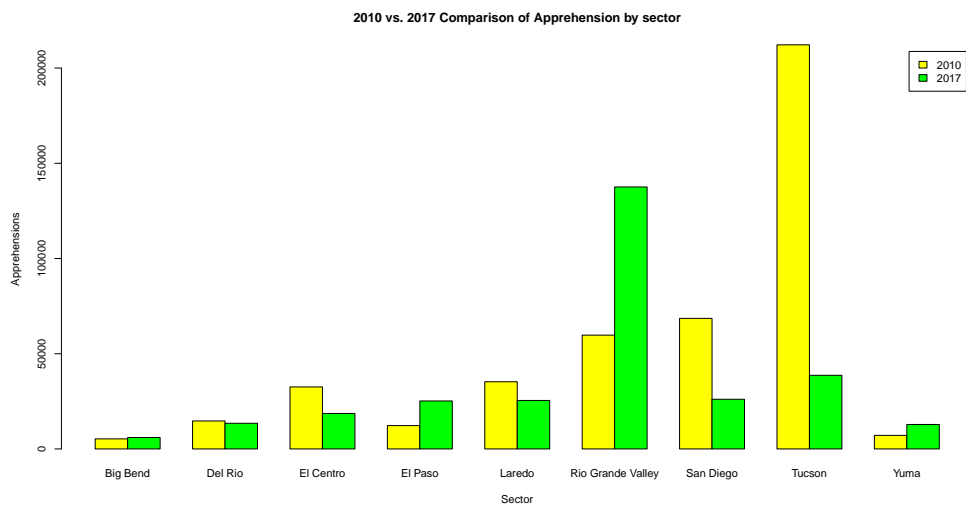

Figure 2: 2010 vs. 2017 Comparison of Apprehension by sector

## Statistical Analysis

Then we ask: has there been a change in the maximum of apprehensions of sectors in 2010 and 2017? has there been a change in the maximum of apprehensions of 3 consecutive months in 2010 and 2017?

The sector with the most apprehensions for 2010 is Tucson. The sector with the most apprehensions for 2017 is Rio Grande Valley. Then we do a two-sample Welch t-test. As a result, the p-value is **0.06346**. Fail to reject the null hypothesis of no change, here is **no** significant change in the maximum of 2010 and 2017

Then we do a two-sample Welch t-test again on 3 month periods with the most apprehensions in 2010 and 2017. As a result, the p-value is **0.4042**. Fail to reject the null hypothesis of no change, here is **no** significant change in the maximum 3 consecutive monthly apprehensions.

```
> #3 month period for 2010 and the most is March-April-May:
> a2010 <- which.max(sapply(1:10, function(i) sum(dMat2010[, i]
+         + dMat2010[, i+1] + dMat2010[, i+2])))
> #The data of 9 sectors during March-April-May 2010 (27 entries):
> dMat2010[a2010:(a2010 + 26)]

[1] 4236 5017 23197 582 421 897 2412 894 2130 3688 4738 16986

## Historical Data Visualization

Finally, we collected all apprehensions data from 2000 to 2017, and plot in time series. Let's see the big picture. The trend is definitely going down.

### Historical Apprehension data from 2000 to 2017

Figure 3: Historical Apprehensions data from 2000 to 2017
